A117.1 Proposed Task Group
Scope and Objectives

January 19, 2023

Name of Study Task Group: Terminology

Scope and Objectives: Review and determine clear and consistent use of technical terminology as this is critically important in the understanding of the design intent and enforcement of the Standard. Draft language as appropriate for new definitions and revisions to existing definitions to use consistent terms throughout the standard. Make recommendations to the Committee for any changes to the Standard.

Tasks: Considerations include, but are not limited to, the following:

1. Review current and proposed technical terminology of and to the Standard and propose terms and definitions for incorporation into Section 107 or modifications to current definitions.
2. Recommend changes in terminology in the Standard for consistence and compliance with the design intent of the Standard.
3. Recommend conforming terminology on the Standard with other standards and codes to the extent possible and also avoid use of related terms defined different in other authoritative documents.

Timetable: Develop and submit recommendations for consideration in the current A117.1 revision cycle.
