

2002 ICC CODE DEVELOPMENT CYCLE CROSS INDEX OF PROPOSED CODE CHANGES

Some of the proposed code changes and corresponding public comments include sections that are outside of the scope of the chapters or the code under which the code change was published. This is done in order to facilitate coordination among the International Codes which is one of the fundamental concepts of the International Codes.

Listed in this index are proposed code changes that include sections or codes other than those listed on page v of the 2002 Code Development Cycle Proposed Changes to the 2000 Editions of the International Codes (code change book). For example, IBC Section 414.6 is proposed for revision in code change F245-02. This proposal was originally heard by the International Fire Code Committee. A public comment has been submitted on F245-02 and the code change will be heard on the Final Action Agenda as part of the IFC agenda (see the tentative hearing order). Another example is Section R308.6.9 of the International Residential Code (IRC) which is a proposed new section in code change S186-02. Originally heard by the IRC Building/Energy Committee, the proposal was published as Part 4 with the IBC Structural code changes and will be heard on the Final Action Agenda as part of the IBC Structural agenda (see the tentative hearing order). In some instances there are other subsections that are revised by an identified code change that is not included in the list. For example, code change EC 18-02 would revise IRC Section N1101.3.2, as indicated on the IRC list, and would also change N1101.3.2.1 and N1102.3.2.2 which are not listed. This was done to keep the list brief enough for easy reference.

This information is provided to assist users in locating all of the proposed code changes that would affect a certain section or chapter. For example, to find all of the proposed code changes that would affect Chapter 7 of the IBC, review the proposed code changes in the Final Action Agenda for the IBC Fire Safety Committee (listed with a FS prefix) then review this cross reference for Chapter 7 of the IBC for proposed code changes published in other code change groups. While care has been taken to be accurate, there may be some omissions in this list. **This list includes all code changes submitted for the 2002 Cycle, not just the code changes which are on the Final Action Agenda.**

Letter prefix: Each proposed change number has a letter prefix that will identify where the proposal is published. The letter designations for proposed changes and the corresponding publications are as follows:

PREFIX PROPOSED CHANGE GROUP (see monograph table of contents for location)

E	International Building Code - Means of Egress
EB	International Existing Buildings Code-Final Draft
EC	International Energy Conservation Code
EL	ICC Electrical Code
F	International Fire Code
FG	International Fuel Gas Code
FS	International Building Code - Fire Safety
G	International Building Code - General
M	International Mechanical Code
P	International Plumbing Code
PC	International Performance Code
PSD	International Private Sewage Disposal Code
PM	International Property Maintenance Code
RB	International Residential Code - Building/Energy
RM	International Residential Code - Mechanical
RP	International Residential Code - Plumbing
S	International Building Code - Structural
Z	International Zoning Code
