

ICC ELECTRICAL CODE HEARING RESULTS

EL1-03/04

Committee Action: **Disapproved**

Committee Reason: The proposal is incomplete regarding the relocation of some or all of the current text of the ICC Electrical Code. Some provisions that are unique to the ICC Electrical Code would be lost if the proposal is approved as submitted. If the ICC Electrical code and NFPA 70 have differing technical and administrative provisions, such differences should be resolved before the ICC Electrical Code is dissolved.

Assembly Action: **None**

EL2-03/04

Committee Action: **Disapproved**

Committee Reason: Important administrative and inspection provisions would be lost if the proposal is approved as submitted. The administrative provisions of NFPA 70 are not consistent with those of the ICC Electrical Code. The ICC Electrical Code was created to compensate for the lack of ICC compatible administrative provisions in NFPA 70. This proposal seeks to undo the work of the IBC General committee performed over the past 3 years relative to the development of the ICC Electrical Code. The ICC Electrical Code already references NFPA 70. The administrative provisions of the ICC Electrical Code serve to provide uniform and consistent code enforcement. The proposal does not provide a point-by-point accounting of what effect this proposal will have relative to code coverage or loss thereof.

Assembly Action: **Approved as Submitted**

EL3-03/04

Committee Action: **Approved as Submitted**

Committee Reason: The ICC codes should use terminology that is consistent with the terminology used in the building industry and this proposal provides such consistency.

Assembly Action: **None**
