

ICC CONSENSUS COMMITTEE ON HURRICANE RESISTANT CONSTRUCTION

The next meeting on the development of hurricane resistant construction requirements will be held on February 14, 2008.

- MEETING NOTICE -

The meeting will be held as a teleconference that will begin from 10:00 a.m. to 12:00 p.m. Central Time on Thursday, February 14, 2008.

The purpose of the meeting is for the committee to consider public comments received from the Call for Comments on the Third Draft of the Standard for Residential Construction in High Wind Regions, dated November 2007.

The Consensus Committee on Hurricane Resistant Construction (IS-HRC) shall have primary responsibility for minimum requirements to safeguard the public health, safety and general welfare through construction and installation requirements for Hurricane Resistant Construction. The requirements contained in the International Codes pertaining to these situations shall be incorporated into the standards developed by the IS-HRC CC.

This meeting is open to the public. If you plan on participating in the meeting, please contact Larry Franks.
