Members:

Staff: Tom Frost

At the September 2005 Meeting, the Industry Advisory Committee requested a review of information concerning floor modifications. Additionally, during the course of the hearing process in Detroit, concerns were raised concerning the process, voting, the order of hearings, decorum, length of days, and procedures for processing.

This committee would consist of 5 Board members and two representatives of the IAC, who would review all information provided by the IAC and staff attendant to the code development hearings. This could include information on electronic voting, remote voting, and the process.
