

GG190-14

504.2

Proponent: Kathleen Petrie, City of Seattle, Department of Planning and Development, representing City of Seattle, Department of Planning and Development (kathleen.petrie@seattle.gov)

Delete without substitution:

~~**504.2 Storage of lamps, batteries and electronics.** Storage space shall be provided for fluorescent lamps, high-intensity discharge (HID) lamps, batteries, electronics, and other discarded items requiring special disposal by the jurisdiction.~~

Reason: As written, Section 504.1 would require infrastructure for pick-up and/or disposal by the jurisdiction which few may have. The charging language of 504.1 does not specify which materials the waste recycling area is designed for, so it could be inclusive of lamps, batteries and electronics. The deletion of 504.2 does not reduce the intent of this section but it does increase flexibility of the IgCC.

Cost Impact: Will not increase the cost of construction.
