

GG206-14

505.2.3

Proponent: Jason Thompson, representing NCMA/MACS (jthompson@ncma.org)

505.2.3 Recyclable building materials and building components. Building materials and building components that can be recycled into the same material or another material with a minimum recovery rate of not less than 30 percent through recycling and reprocessing or reuse, or building materials shall be recyclable through an established, ~~nationally available~~ closed loop manufacturer's take-back program.

Reason: Many materials are sourced, manufactured and used locally without any form of a national distribution network. Requiring a nationally available take-back program for these materials is impractical and counterproductive to the sustainable objectives of the IgCC.

Cost Impact: Will not increase the cost of construction.
