

2009 IBC Handbook Fire- and Life-Safety Provisions

Errata

Section 1210.1, page 461. Replace the 2nd paragraph with the following paragraph: “Although the materials use for the floor covering and the wall base are to all have a smooth, hard nonabsorbent surface, they can be different materials. For example, a top set rubber base extending at least 4 inches (102 mm) up the wall is generally viewed as acceptable in conjunction with a floor covering of vinyl composition tiles.” (posted 7/2/11)
