

Seismic and Wind Forces: Structural Design Examples, 4th Edition

Errata

Page 13, Example 1-5, the correct values are $S_s = 0.005$ and $S_1 = 0.019$. The correct final answers are $S_{MS} = 0.080g$ and $S_{M1} = 0.046g$.

Page 22, Example 1-10, the correct values are $S_{MS} = 0.080g$ and $S_{M1} = 0.046g$. The correct final answers are $S_{DS} = 0.053g$ and $S_{D1} = 0.031g$.

Page 29, Example 1-13, the correct values are $S_{DS} = 0.053g$ and $S_{D1} = 0.031g$. The final answer is unchanged.
