

# Driving **GROWTH** and **AFFORDABILITY** through **INNOVATION** and **SAFETY**

## FAMILY OF COMPANIES

# About ICC

The International Code Council (ICC) is a member-focused association with over 64,000 Members. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the ICC-published International Codes® (I-Codes®).

The I-Codes® provide minimum safeguards for people at home, at school and in the workplace. The I-Codes are a complete set of comprehensive, coordinated building safety and fire prevention codes. Building codes benefit public safety and support the industry's need for one set of codes without regional limitations.

Fifty states and the District of Columbia have adopted the I-Codes at the state or jurisdictional level. Federal agencies including the Architect of the Capitol, General Services Administration, National Park Service, Department of State, U.S. Forest Service and the Veterans Administration. The Department of Defense references the *International Building Code*® for constructing military facilities, including those that house U.S. troops around the world and at home. Amtrak uses the *International Green Construction Code*® for new and extensively renovated sites and structures. Puerto Rico and the U.S. Virgin Islands enforce one or more of the I-Codes.

## VISION & MISSION

**Vision:** Protect the health, safety and welfare of people by creating safe buildings and communities.

**Mission:** To provide the highest quality codes, standards, products and services for all concerned with the safety and performance of the built environment.

## VALUES:

- Customer Value
- Integrity and Trust
- Member Focus
- Professionalism
- Public Service
- Quality

## HISTORY

The ICC was established in 1994 as a non-profit organization dedicated to developing a single set of comprehensive and coordinated national model construction codes. The founders of the ICC are Building Officials and Code Administrators International, Inc. (BOCA), International Conference of Building Officials (ICBO) and Southern Building Code Congress International, Inc. (SBCCI). In the early part of the last century, these non-profit organizations developed three separate sets of model codes used throughout the United States. Although regional code development had been effective and responsive to our country's needs, the time came for a single set of codes. The nation's three model code groups responded by creating the ICC and by developing codes without regional limitations; the I-Codes.

## ICC FAMILY OF COMPANIES

[www.iccsafe.org](http://www.iccsafe.org)  
888-422-7233

# Membership

At the heart of ICC's rich history is our partnership with our Members. ICC and its Members work together to create safer homes, neighborhoods and workplaces by promoting and maintaining the I-Codes. ICC Members benefit from top-notch education and professional development, innovative products and services, timely industry news and valuable networking opportunities while lending their own expertise to the code development process.

The organization offers several membership categories and an extensive system of regional offices, chapters and key relationships with officials at the state and local levels of government.

Code enforcement and fire officials, designers, architects, construction professionals, corporate representatives and others involved in the development and maintenance of the built environment are all valued Members of the ICC.

## MEMBER BENEFITS

As an ICC Member, you can expect nothing less than world-class service. ICC maintains cost-effective dues, while providing invaluable benefits, such as:

- Free code book(s) – new Members receive a free book or set of books (depending on membership category).
- 10%–25% off code books, CDs, specialized publications and training materials.
- Discounts on world-class training and educational programs so you can learn while you earn CEUs and LUs.
- Professional certification verify your knowledge and advance your career through ICC's certification programs. ICC Members receive discounts on study materials and certification renewals.
- Opinions from experts to answer your code-related questions.(depending on Member category).

[www.iccsafe.org/membership](http://www.iccsafe.org/membership)  
888-422-7233

# Products

The Code Council offers a comprehensive portfolio of quality products to meet the needs of a diverse audience and evolving industry. The variety of codes, standards, guidelines and support documents assist design, construction and code enforcement professionals with the important duty of ensuring public safety. ICC publications are available in multiple formats including print, PDF download, and premium online subscription.

## INTERNATIONAL CODES® (I-CODES®)

The family of International Codes is the most comprehensive set of construction provisions available. The I-Codes developed to integrate with each other to provide a uniform set of codes that yields positive impacts on building safety at an affordable cost. The family of codes contains provisions that facilitate flexibility and innovation.

## REGIONAL CODES

Currently, one or more of the I-Codes have been adopted or is in use in all 50 United States, the District of Columbia, Guam, Puerto Rico, U.S. Virgin Islands and many global markets. Some states and regions adopt a specific edition of the I-Codes, while others work with the Code Council to customize the codes for statewide or local use with amendments specific to the climatic, geographic and topographical conditions of the jurisdiction.

## THE INTERNATIONAL CODE FAMILY

- \***IBC**® *International Building Code*®
- \***ICCPC**® *International Code Council Performance Code*® for Buildings and Facilities
- \***IECC**® *International Energy Conservation Code*®

## STANDARDS

ICC Standards are developed utilizing a consensus process and are adopted by reference to be used with the I-Codes or as a standalone document by jurisdictions internationally. The standards are approved by the American National Standards Institute (ANSI) and address important topics such as accessibility, energy efficiency, solar thermal, bleachers and grandstands, log structures, storm shelters, residential dwellings in high-wind regions and green residential building.

## COMMENTARIES

Code application is clarified in the Code and Commentary series to ensure thorough understanding of how to interpret, apply and enforce the I-Codes. Each book reprints every code section in its entirety and follows it immediately with corresponding commentary written by ICC experts.

## GUIDELINES

Also a part of the Code Council's full array of technical publications, the Guideline series brings focused attention to areas such as commissioning, replicable buildings, acoustics and toilets.

## DIGITAL PRODUCTS

The I-Codes and most support references are now available as immediate PDF downloads, in addition to printed editions. The 2018 editions of the I-Code downloads include redline versions showing code text with revisions made to the 2015 edition. ICC's innovative **premiumACCESS** online subscriptions offer code users superior digital features and mobility. Using an Internet connection, subscribers can save time with advanced search, highlight, add notations, and collaborate with colleagues. Many subscriptions options are available for I-Codes, State Codes, ICC Standards and Commentaries.

## EXAM PREPARATION

Two popular study tools, the Study Companion Series and FlashCards, have been helping exam candidates with test preparation for years using self-paced study lessons. Each Study Companion takes the reader step-by-step through critical points of the code using discussion and illustrations to assist in understanding the content.

## PUBLISHING PARTNERS

The Code Council is pleased to work with notable publishing houses such as Cengage Learning, McGraw-Hill, John Wiley & Sons, Fairchild Books/Bloomsbury, and Taunton Press, as well as professional associations including NFPA, RESNET, ASHRAE, ASTM, AIA, NAHB, NCSEA, SEAOC, CALBO, NSSA, APSP, ASABE, ASCE, MBMA, MIA and SMACNA. These partnerships have helped ICC to develop best-selling publications that ensure smooth transitions for code users moving from one edition of the code to the next.

## SUPPORT REFERENCES

The Code Council Product Development team is dedicated to meeting the everyday needs of all who interpret, apply and administer the I-Codes. A complete system of support publications is available, from in-depth textbooks to quick-reference guides, such as the *International Building Code Illustrated Handbook*, *Significant Changes and Essentials Series*, *Turbo Tabs*, *Inspector's Guides* and many more.

# Code Development

The Code Council develops construction and public safety codes through a governmental consensus process. This system of code development has provided the highest level of safety in the world for more than 90 years.

Every three years a new code cycle begins with code change proposals then proceeds to committee hearings and public action hearings. The cycle culminates with the publishing of a new edition of the International Codes® ready to be adopted throughout the U.S. and by the global community. As one code cycle comes to completion, the next code cycle begins.

## OPENNESS

- Participation in the development of the codes, including code hearings, is open to all at no cost.
- Anyone can submit a code change proposal or make a public comment.
- Code committees must consider all views before voting.

## TRANSPARENCY

- Any committee vote and the reasons for that vote must be documented.
- Final decisions are made in an open hearing by public safety officials.

## BALANCE OF INTEREST

- Committee members represent general interests, user interests, producer interests or multiple interests. One-third of the committee's members must be public safety officials.
- Committee members cannot vote on issues that are a conflict of interest.
- ICC membership is not a condition of committee membership.

## DUE PROCESS

- A code change proponent has the opportunity to rebut opponents and vice versa.
- Anyone who attends the hearing can testify.
- Committees are required to consider all views, objections and the cost impact of all code change proposals.

## GET INVOLVED

ICC makes it easy for you to become part of this vitally important process.

- With the advent of cdpACCESS®, getting involved is a mouse click away. Find a section of code you believe needs improvement, submit a code change proposal and follow it through the process.
- Look for “Calls for Committees” on the ICC website and apply for openings on one of the many Code Development Committees.
- Attend Code Action Hearings live. Study the agendas and add value by sharing your vast experience with your testimony. You may also view hearings online.

[www.iccsafe.org/code-development](http://www.iccsafe.org/code-development)  
888-422-7233

## EMPOWERED PARTICIPATION

**cdpACCESS®** is the Code Council's new cloud-based system for the code development process (cdp). Log in with your myICC username and password to collaborate, review, submit and vote (if eligible) on code change proposals and public comments.

## COLLABORATE

**cdpACCESS®** allows you to create code change proposals and public comments and store them in the cloud for easy access and submission. You can also invite colleagues to view, comment and collaborate on your proposals/comments.

Once you log in, click on "Proposals," then "Create New Proposal" to begin.

## VOTE

It is easy to review hearing testimony and vote on code change proposals and public comments in **cdpACCESS®**. After the Committee Action Hearings, ICC members will be able to view the hearing for those code changes that received an assembly motion and vote on the motions. After the Public Comment Hearings, ICC Governmental Member Voting Representatives and Honorary Members will be able to view the hearings and vote on the Online Governmental Consensus Vote.

## SUPPORT

Support for **cdpACCESS®** is just a click or phone call away.

View help files and tutorial videos about **cdpACCESS®** by clicking "Help" at the top of the screen, or contact ICC staff.

# Plan Review Services

From high-rise commercial buildings and retail facilities to residential developments, schools, hospitals, and civic institutions, no plan review is too complex or too large for the code experts of ICC's Plan Review Services. That's why federal, state and local government agencies, architects and building professionals turn to ICC for the most accurate code analysis in the country. Every plan is prepared by licensed and ICC-certified engineers and architects who understand the International Codes (I-Codes) and legacy model codes better than any other plan review service in the building industry.

## WHAT WE OFFER

- The most comprehensive and detailed plan reviews in the industry with turnaround times coordinated with the permit processes.
- Reviews to the I-Codes or legacy codes (BOCA, SBCCI, ICBO), as well as state codes based on the International Codes with minor amendments.
- Reviews to disciplines including building (structural and non-structural), mechanical, plumbing, electrical, accessibility, energy conservation, and fire protection systems.
- A detailed checklist of code compliance and violations as well as one complimentary re-review of reissued plans.

## PLAN REVIEW SERVICE OPTIONS:

### LIMITED SCOPE

Evaluations of specific code topics as applied to a project, or special studies of particular building components or applications.

### PRELIMINARY

The review of initial design code compliance including use and occupancy classification, height and area calculations, means of egress, fire-resistance construction requirements and foundation design.

### COMPLETE

Comprehensive review of design drawings and specifications to the disciplines requested.

### AS EASY AS 1-2-3

1. Send the required plans, specifications, and other design documents along with an authorization for ICC to perform the plan review. In addition to submitting hard copy plans, another method you may use is the ICC ePlan Services powered by Avolve Software.
2. Within 15 to 20 working days, ICC will respond with a comprehensive plan review report and checklist.
3. If necessary, send the revised drawings along with resolutions to the code deficiencies to ICC for a complimentary re-review.

[www.iccsafe.org/PlanReview](http://www.iccsafe.org/PlanReview)

# Learning Center

The Learning Center at ICC provides training and education to building safety, fire, design, and construction professionals on how best to apply and enforce the codes and leadership topics.

Training and education programs are designed for maximum impact and results by assisting you in developing professional skills, advancing your career, expanding your knowledge base, and/or preparing for your next certification exam. Stay on the leading edge of the industry while earning valuable CEUs.

All Learning Center training opportunities are developed and led by nationally recognized code experts with decades of experience. We offer convenient learning opportunities in a variety of formats, including classroom, virtual, live web session and online courses.

## CLASSROOM

The Learning Center's multi-day Institute, single-day Seminars, and Certification Test Academies offer in-depth training from leading code and building safety experts held at locations throughout the U.S. Network with your peers and get on-the-job questions answered at an in-person training. Also, Hire ICC to Teach provides the opportunity to bring ICC's expert instructors to the location of your choice. Choose from a wide range of topics or work with the Learning Center experts to develop customized training to meet your needs.

## VIRTUAL CLASSROOM

Join a live training event from any location – whether you're in the office or at home. All you need is a standard Internet connection. Virtual classrooms are a hybrid learning environment where you participate remotely and experience the same collaboration, instructor interaction and learning benefits as if you were physically in the classroom.

## LIVE WEB SESSION

Participate in targeted training events by taking advantage of a web session series to give you the training you need in the timeframe you need it while getting all the CEUs you need for certification renewal.

## ONLINE

Online learning is available 24/7 and features topics such as exam study, code training, management, leadership, and financial planning.

## PREFERRED PROVIDER PROGRAM

Open the door to extensive training opportunities with ICC-approved educational offerings by a variety of providers as they relate to codes, standards and guidelines, as well as building construction materials, products and methods.

# Assessment Center

The ICC is a world-class leader in providing professional certifications and construction trade licensing exams for code inspection, administration personnel, and contractors worldwide. ICC national certification exams provide individuals with an opportunity to get professional recognition and demonstrate their knowledge of various construction regulatory codes, standards and practices.

Currently, 61,000 individuals hold ICC certifications in one or more of 75 areas of expertise, including over 800 Master Code Professionals (MCP), the highest designation recognized in the profession. Many building departments require ICC certification for employment and career advancement.

An ICC certification represents a significant accomplishment that offers invaluable benefits, including:

- Increased salary potential.
- Career advancement opportunities.
- Verification of commitment to protect public health, safety and welfare.
- Validation of technical expertise.
- Professional recognition of being certified by ICC—the premier organization for building safety.

The ICC Assessment Center offers many enhanced features such as:

- Single sign-on for both online and computer-based testing through myICC, along with new features such as print-on-demand certificates and automatic combination designations.
- The option to purchase exams directly from the ICC Store.
- ICC PRONTO™, your remote-proctored, online testing option, is available for more than 70 exams. There's no wait time to take an exam, and you can take an exam any time of day or night, in virtually any secure location. Taking your next ICC certification exam is now more convenient, more comfortable and more efficient than ever before. With ICC PRONTO, you can take many of ICC's national certification exams online, at your convenience, from any secure location.

ICC is continually evolving exam offerings, testing options and technology to ensure that all building and code officials have access to the tools and resources needed to advance in today's fast-paced and rapidly changing world.

Make an ongoing commitment to effective code compliance, by obtaining certifications through ICC.

# SAFETY 2.0

Safety 2.0 is the Code Council's signature initiative to welcome a new generation of members and leaders to the building safety profession. Through the programs below, we are Building Careers for Today's Generation.

## **BUILDING SAFETY CAREER PATH INITIATIVE**

The ICC Building Safety Career Path Initiative introduces the building safety profession as an exciting and attractive career option for individuals and audiences not traditionally connected to building safety.

## **EMERGING LEADERS MEMBERSHIP COUNCIL**

The Emerging Leaders Membership Council (ELMC) serves as an entry point for new, motivated members to engage in the activities of the Code Council.

## **HIGH SCHOOL & COLLEGE TECHNICAL TRAINING PROGRAMS**

The High School Technical Training Program (HSTTP) and College Technical Training Program (CTTP) are flexible educational programs based on ICC's International Residential Code® divided into six parts: building, plumbing, HVAC (mechanical), electrical, masonry and energy. Schools can easily integrate the program into its current construction trade curricula to better provide students with a comprehensive knowledge of construction trades and prepare them for industry careers.

## **MILITARY FAMILIES CAREER PATH PROGRAM**

The Military Families Program helps veterans who are transitioning to civilian life and their family members learn more about building safety career options. We are grateful for the sacrifices the service members and their families have made to keep us safe and are committed to ensuring their success after service. This is a tremendous opportunity for military family members and veterans looking to enter the civilian workforce.

**SAFETY 2.0**

# ICC Evaluation Service® (ICC-ES®)

ICC EVALUATION SERVICE, LLC (ICC-ES®) is a subsidiary of the International Code Council and is accredited by the American National Standards Institute (ANSI) to the requirements of ISO/IEC 17065.

With nearly a century of experience and close to 1,600 evaluation reports, ICC-ES is the industry leader in performing technical evaluations of building products and materials for code compliance. ICC-ES is the most widely accepted and trusted brand in the nation and internationally for building product evaluations.

## EVALUATION REPORTS (ESR)

An ICC-ES Evaluation Report is a report on a specific building product, and represents an independent evaluation of how the product meets performance and prescriptive provisions in the International Codes® (I-Codes®), ensuring public safety while allowing innovation to thrive. When new or innovative products not adequately addressed by the code are submitted for evaluation, an Acceptance Criteria is developed, discussed and approved in open public hearings with the Evaluation Committee and interested parties. The ICC-ES ESRs are posted free of charge at [www.icc-es.org](http://www.icc-es.org).

## PLUMBING, MECHANICAL AND FUEL GAS LISTINGS PROGRAM (PMG)

The ICC-ES PMG is the premier product certification program for North America, certifying Plumbing, Mechanical and Fuel Gas products to the requirements of International, Uniform and Canadian Codes and Standards.

ICC-ES PMG is accredited by ANSI and the Standards Council of Canada (SCC), offering listings to meet all manufacturer certification needs in the United States and Canada. ICC-ES PMG is also accredited by entidad mexicana de acreditación (ema), to certify plumbing products to the Official Mexican Standards (NOMs). ICC-ES PMG is also accredited by the U.S. Environmental Protection Agency to certify water-efficient products under the WaterSense® program. ICC-ES PMG Listings are posted free of charge at [www.icc-es.org/pmg](http://www.icc-es.org/pmg).

## BUILDING PRODUCT LISTING PROGRAM (ESL)

The ICC-ES Building Product Listing Program is accredited by both ANSI and the SCC. It offers listings for manufacturers of building products to show their product compliance with applicable consensus standard(s) referenced in the I-Codes. Compared to an ICC-ES Evaluation Report (ESR), the program covers aspects of the product as outlined in the standard and specific related code sections, its installations and implications. The listing categories can be found at [www.icc-es.org/listing](http://www.icc-es.org/listing).

## PRODUCT TESTING

ICC-ES provides a one-stop shop for the evaluation, listing and testing of innovative building and plumbing products, through a cooperation with Innovation Research Labs, a highly respected ISO 17025 accredited testing lab with over 50 years of experience. ICC-ES' Scope of testing can be found at [www.icc-es.org/product-testing](http://www.icc-es.org/product-testing).

## ICC-ES VAR ENVIRONMENTAL PROGRAMS (EP)

The ICC-ES Environmental Program (formerly known as SAVE™) provides manufacturers with comprehensive evaluation and/or certification that their products meet specific sustainability targets. The ICC-ES Environmental Programs offer evaluations under the ICC-ES VAR Environmental Report Program and certifications under the Environmental Product Declaration Program. Learn more at [www.icc-es.org/ep](http://www.icc-es.org/ep).

[www.icc-es.org](http://www.icc-es.org)  
800-423-6587 x1

# International Accreditation Service® (IAS®)

The International Accreditation Service (IAS), a subsidiary of the ICC, provides several accreditation programs that are used by regulators and industry to verify if programs or institutions meet established standards and are competent to carry out specific tasks.

Federal, state and local governmental agencies require accreditation to verify the technical competence of organizations like laboratories, inspection bodies and certification agencies. Building departments and fire prevention departments seek accreditation to demonstrate their competence, professional qualifications and ability to serve their jurisdictions.

IAS accreditation assesses an organization's formal processes and procedures, staff, equipment and service goals. IAS issues a certificate of accreditation to entities that successfully complete the assessment process and demonstrate compliance with the applicable requirements.

All IAS accreditation certificates, which provide details on the accreditation status and scope of accreditation, are available to view at no cost at [www.iasonline.org](http://www.iasonline.org).

## ORGANIZATIONS ACCREDITED BY IAS

IAS uses a formal, independent and internationally recognized process to accredit the following:

- Testing and calibration laboratories
- Special inspection agencies
- Inspection agencies
- Inspection programs for metal building manufacturers
- Inspection practices for metal building systems assemblers
- Steel, concrete, and wood wall panel fabricators inspection programs
- Commissioning training and certification providers
- Product certification agencies
- Training agencies and curriculum developers
- Field evaluation bodies
- Building departments
- Fire prevention departments
- Third-party building department service providers
- Personnel certification bodies

A pioneer in the accreditation profession, IAS actively develops new accreditation programs for organizations seeking to demonstrate the highest level of competence and service in their respective industries.

## TRAINING

IAS offers training in many quality-related areas that has proven to be of value to those interested in achieving and maintaining accreditation to international standards. Classroom and online training programs are custom designed for the target audience and utilize a combination of teaching techniques including real-world examples, student interaction and hands-on activities.

[www.iasonline.org](http://www.iasonline.org)  
866-427-4422

S. K. Ghosh Associates provides seismic and code-related consulting services to engineers, businesses, trade associations, code-writing bodies, and governmental agencies involved in the design and construction of buildings and other structures that are impacted by the provisions of building codes.

The company serves as a technical resource on structural codes and standards for code development and enforcement agencies and personnel; design professionals; academics; and the material industries. Technical support is provided through publications, seminars, peer reviews, research projects, computer programs, code interpretations and comparisons, a website, and other means.

## OUR SERVICES INCLUDE:

- Interpretation of structural codes
- Seminars explaining structural code provisions
- Presentation to code bodies and other governmental agencies
- Historical research on structural code provisions
- Assessment of effects of creep, shrinkage, and temperature on structures
- Feasibility studies on new construction products and systems
- Support of application for evaluation reports from model code organizations
- Identification of research needs, planning and development of research programs
- Peer review of structural, including seismic, design
- Execution of research and development programs related to structural performance, structural integrity and extraordinary loads
- Consultancy on code compliance of structural design

# General Code CMS

General Code CMS, LLC, a subsidiary of the ICC, provides content management solutions for local governments and associated agencies to produce greater efficiency and transparency.

## STREAMLINE AND TRACK YOUR LAND MANAGEMENT PROCESSES

Code enforcement officers and building inspectors deal with a lot of difficult issues. The list includes angry homeowners and miserable weather. One thing that shouldn't be on this list is managing data and tracking information. **Municipity**® makes this aspect of your job a lot easier. It provides an intuitive and accurate information tracking solution that meets the demanding needs of municipal Building, Planning & Zoning departments. It allows you to electronically access, manage and archive applications, inspections, permits, photos, and more. And it will get your staff working together as an integrated team.

Municipity allows you to:

- Schedule
- Inspect
- Permit
- Access
- Understand
- Report

## ORGANIZATION-WIDE SOLUTIONS

General Code is a reseller of **Laserfiche**®—the world's leading software for Enterprise Content Management, business process automation and productivity-boosting analytics. From digitizing documents to supporting smarter decisions, **Laserfiche**® provides a progressive roadmap to help organizations of all sizes embrace the benefits of digital transformation. **Laserfiche**® revolutionizes how organizations manage information, from the point that information is captured, to reporting and compliance.

## PROCESS AUTOMATION

General Code's newest innovation, **GCStreamline**, accelerates the implementation of key Process Automation concepts. This generates a faster return on investment in Document and Records Management processes within your organization. With **GCStreamline**, you can enhance your return on investment and leverage your **Laserfiche**® system to do more, while implementing it faster. We can create electronic forms, configure your workflow routing and integrate with third-party software applications for departmental and enterprise-wide business processes. You'll do more with less, reduce employee stress, and realize cost savings.

# General Code Codification

General Code's Codification Division, a subsidiary of the ICC, provides codification services to local governments to support compliance with state and local legislation and to provide greater access to municipal codes and related public documents.

## ORDINANCE CODIFICATION FOR LOCAL GOVERNMENTS

The codification process keeps a local government's laws organized, structured and updated to serve as a good legal reference for the municipality and its citizens. A legal review and analysis of local ordinances as they relate to state statutes identifies conflicts and ensures consistency with state laws and accuracy within the municipal code, in paper format or online.

General Code's Codification Services include:

- Creating and publishing new municipal codes
- Recodification of existing municipal codes
- Integrated or stand-alone Zoning Codes that are graphically rich or traditional text based, in print format or online
- Editorial and legal review of ordinances by attorneys, legal editors and codification consultants
- Supplementation services
- Online publishing of municipal Codes via **eCode360®**, General Code's exclusive platform specifically designed to house and deliver access to ordinances via the Internet

- **eCode360® MapLink™ powered by ZoningHub™** presents Zoning Code data in an interactive map, making it easier for developers and prospective business owners to find and understand local zoning regulations to keep their projects moving forward
- Online access to minutes, agendas, budgets, comprehensive plans, and other non-code materials via **PubDocs™**
- **eCode Search™ App**: the only mobile app that allows remote, mobile access and searchability of municipal codes

Serving over 3,000 municipal governments, General Code delivers its codification services with unmatched municipal expertise and commitment to client care. General Code is dedicated to assisting local governments to make laws and related information more accessible by providing tools that are feature-rich and focused on the user experience.

# Alliance for National & Community Resilience

ANCR is a subsidiary of the Code Council. It is a 501(c)3 nonprofit committed to creating the U.S.'s first whole-community resilience benchmarking system. This system will provide communities with a transparent, practical and common-sense metric to quickly and easily gauge their cross-sector resilience efforts.

## WHAT IS RESILIENCE?

Resilience is about building strength and opportunity in the entire community across all aspects—the economy, the society and the infrastructure. It is about unleashing the expertise and innovative spirit within the business sector, building strong ties and exceptional quality of life within neighborhoods and creating forward-looking, supportive community organizations. It is about making the whole community better, adaptive, more competitive, more robust and more productive.

## THE ANCR BENCHMARKING SYSTEM

ANCR has identified 19 core functions that every community, regardless of size or location, must perform. The organization is convening subject matter expert technical committees to address what constitutes resilience in each area and what practical and credible systems, ratings, guides, standards and best practices exist to assess the resilience of each community function. Once the discovery process is complete, ANCR will consolidate these items into a convenient, straightforward format. Communities will use the benchmarks as an accredited self-assessment to determine whole-community resilience and the resilience of each individual community function.

## ABOUT ANCR:

Since its inception in 2016, ANCR has partnered with private and public entities from a variety of different fields to build the benchmarking system. To date, ANCR has:

- 34 organizational members;
- A corporate council that includes representatives from Target and Dow Chemical; and,
- More than 40 subject matter experts to serve on technical committees.

## ICC ALSO OFFERS GLOBAL SERVICES

Global Services provides technical and institutional assistance to the global community in the area of building safety. The Global Services team collaborates with other ICC departments by providing coordination and support to global economies interested in the adoption or adaptation of the International Codes, education and training programs, certification, code administration and enforcement.

The ICC is committed to promoting safe building construction worldwide through practical application of regulation and enforcement mechanisms to increase the effectiveness of the building codes and their role in disaster risk reduction and use of sustainable natural resources.

*Our mission is to provide the highest quality codes, standards, products and services for all concerned with the safety and performance of the built environment.*
