

INTERNATIONAL  
CODE  
COUNCIL®

The **International Energy Conservation Code** addresses the design of energy-efficient building envelopes and the installation of energy-efficient mechanical, lighting and power systems through requirements emphasizing performance.

## The IECC is being used in:

United States | Member nations of the Caribbean Community (CARICOM) | Mexico | Saudi Arabia | Abu Dhabi

The IECC has saved U.S. consumers over **\$44 billion** and avoided **300 million tons** of carbon dioxide emissions.

## This is equivalent to:

Greenhouse gas emissions from **15 million** garbage trucks of waste recycled instead of landfilled

\*1 truck = 1 million trucks

Or, CO<sub>2</sub> emissions from **32 million** homes' energy use for one year

\*1 home = 1 million homes

Or, carbon sequestered by **353 million** acres of U.S. forests in one year

1 tree = 10 million acres of forest
