People Helping People Build a Safer World®

Driving Growth and Affordability Through Innovation and Safety

An Overview of the International Code Council

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

Services of the ICC

The organizations that comprise the International Code Council offer unmatched technical, educational and informational products and services in support of the International Codes, with more than 200 highly qualified staff members at 16 offices throughout the United States. Some of the products and services readily available to code users include:

- CODE APPLICATION ASSISTANCE
- ONLINE NEWSLETTERS
- EDUCATIONAL PROGRAMS
- PUBLICATION OF PROPOSED CODE CHANGES
- PREFERRED PROVIDER PROGRAM FOR EDUCATORS
- TRAINING AND INFORMATIONAL VIDEOS
- CERTIFICATION PROGRAMS
- BUILDING DEPARTMENT ACCREDITATION PROGRAMS
- TECHNICAL HANDBOOKS AND WORKBOOKS
- EVALUATION SERVICE FOR CODE COMPLIANCE
- PLAN REVIEW SERVICES
- EVALUATIONS UNDER GREEN CODES, STANDARDS AND RATING SYSTEMS
- DIGITAL PRODUCTS
- CONTENT MANAGEMENT SOLUTIONS
- ORDINANCE CODIFICATION

ICC EVALUATION SERVICE, LLC (ICC-ES) is the industry leader in performing technical evaluations for code compliance, providing regulators and construction professionals with clear evidence that products comply with codes and standards.

INTERNATIONAL ACCREDITATION SERVICE (IAS) accredits testing and calibration laboratories, inspection agencies, building departments, fabricator inspection programs and IBC special inspection agencies.

SOLAR RATING & CERTIFICATION CORPORATION (ICC-SRCC) fulfills the industry's need for a single, national program that allows manufacturers to rate and test the efficiency of solar equipment. In addition, ICC-SRCC also includes the Small Wind Certification Council that can facilitate in independent certification of Wind Turbines.

S. K. GHOSH ASSOCIATES (SKGA), the preeminent technical resource on structural codes and standards, SKGA supports Authorities Having Jurisdiction, design professionals and others through its specialized publications, seminars, research projects and services.

GENERAL CODE is a market leader in codification and enterprise content management solutions for local municipalities across the United States.

ALLIANCE FOR NATIONAL & COMMUNITY RESILIENCE is an ICC co-founded national coalition aimed at improving resilience and implementing good community practices.

SIGNIFICANT CHANGES TO THE CALIFORNIA BUILDING CODE: 2016 EDITION

Gain full access to the most critical updates to the *California Building Code*, the real-world application of those changes, and why they originated all in a single, easy-to-use resource. Coverage includes changes made to both structural and nonstructural provisions. Each change analysis features the affected code sections and identifies the change as newly-added text, a modification of the existing language, or deleted text. Accompanying each change is a detailed illustration or example, which brings the technical language of the code to life in a real-world setting.

SIGNIFICANT CHANGES TO THE CALIFORNIA RESIDENTIAL CODE: 2016 EDITION

This reference provides a solid understanding of the latest updates to the *California Residential Code*, in one single, easy-to-use resource! The book focuses on provisions that have special significance, are utilized frequently, or have had a change in application from the 2013 edition of the code. Each change is accompanied by a photograph, a real-world application example, or an illustration to assist and enhance understanding. With a summary and discussion of the impact of these changes, this guide's coverage is complete, making it the perfect tool for transitioning to the new 2016 CRC.

FROM ICC AND SEAOSC!

DESIGN GUIDE, VOLUME 1: CITY OF LOS ANGELES MANDATORY EARTHQUAKE HAZARD REDUCTION IN EXISTING NON-DUCTILE CONCRETE BUILDINGS (NDC)

This design guide discusses and demonstrates methodologies for the seismic evaluation and strengthening of existing non-ductile concrete buildings. While aspects of this guide focus on the mandatory City of Los Angeles earthquake hazard reduction ordinance and historical construction practices of the Southern California region, it is generally applicable to any other existing concrete buildings in areas of moderate or high seismicity. The guide collects practical advice, guidance on implementing current evaluation and retrofit methodologies, summaries of relevant and useful reference materials, and detailed examples to address this challenging subject. This design guide was written for use with the 2017 *City of Los Angeles Building Code* based on the 2015 IBC® and ASCE 41-13. It is an excellent resource for practicing professional engineers, architects, building officials, academics, and students evaluating this type of structure. (298 pages)

DESIGN GUIDE, VOLUME 2: CITY OF LOS ANGELES MANDATORY EARTHQUAKE HAZARD REDUCTION IN EXISTING WOOD-FRAME BUILDINGS WITH SOFT, WEAK OR OPEN-FRONT WALLS (SWOF)

This design guide provides an example and detailed commentary for the seismic strengthening of existing wood-frame buildings with soft, weak or open-front (SWOF) wall lines subject to the recently passed mandatory Los Angeles Ordinance. The design example in this guide demonstrates a prescriptive, ordinance-based retrofit approach for a typical open-front wall line. Following this example, a demonstration is given showing how FEMA P807 could be used to design a retrofit for the same example building. This design guide was written for use with the 2014 *City of Los Angeles Building Code* based on the 2012 IBC and ASCE 7-10. (114 pages)

WASHINGTON

VERMONT

2015 INTERNATIONAL BUILDING CODE WITH WASHINGTON STATE AMENDMENTS

The Evergreen State and ICC have released a helpful resource that combines the 2015 *International Building Code*® with customized amendments adopted statewide in Washington last July. The integrated code book will increase ease of use for building officials, local government, and industry and design professionals. The up-to-date requirements for commercial construction will help designers and contractors create safer, more resilient communities. (742 pages)
