DISCUSSION GUIDE 2021 (GROUP A) ICC CODE DEVELOPMENT CYCLE PUBLIC COMMENT AGENDA DISCUSSION GUIDE

The purpose of this guide is to assist the efficient discussion of the individual agenda items by providing an overview of the committee actions, assembly actions (if any) and the submitted Public Comments. The agenda items are listed in the same order as the published Tentative Hearing Order on page xxxix of the 2021 Public Comment Agenda document.

See page xxxviii of the 2021 Public Comment Agenda document (Section 7.5 of CP#28-05). Section 7.5.9.5 requires that the Code Development Committee Action be the initial motion.

Whenever a motion under consideration is for Approval as Submitted or Approval as Modified, a subsequent motion and second for a modification published in the Public Comment Agenda may be made (see Section 6.4.4). Each subsequent motion for modification, if any, shall be individually discussed and voted before returning to the main motion. When the initial motion is for Disapproval, that motion must be voted upon before any other motions are entered. This is reflected in the column under "Allowable Subsequent Motions per Section 7.5.9.6 (CP#28).

Excerpts from CP #28:

7.5.9.5 Initial Motion: The code development committee action shall be the initial motion considered.

7.5.9.6 Motions for Modifications: Whenever a motion under consideration is for Approval as Submitted or Approval as Modified, a subsequent motion and second for a modification published in the Public Comment Agenda may be made (see Section 6.4.4). Each subsequent motion for modification, if any, shall be individually discussed and voted before returning to the main motion. A two-thirds majority based on the number of votes cast by eligible voters shall be required for a successful motion on all modifications.

7.5.9.7 Voting: After dispensing with all motions for modifications, if any, and upon completion of discussion on the main motion, the Moderator shall then ask for the vote on the main motion. The vote on the main motion shall be taken electronically with the vote recorded and each vote assigned to the eligible voting member. In the event the electronic voting system is determined not to be used by ICC, a hand/standing count will be taken by the Moderator. If the motion fails to receive the majority required in Section 7.6, the Moderator shall ask for a new motion.

7.5.9.8 Subsequent Motion: If the initial motion is unsuccessful, a motion for either Approval as Submitted or Approval as Modified by one or more published modifications is in order. A motion for Disapproval is not in order. The vote on the main motion shall be taken electronically with the vote recorded and each vote assigned to the eligible voting member. In the event the electronic voting system is determined not to be used by ICC, a hand/standing count will be taken by the Moderator. If a successful vote is not achieved, Section 7.5.9.9 shall apply.

7.5.9.9 Failure to Achieve Majority Vote at the Public Comment Hearing. In the event that a code change proposal does not receive any of the required majorities in Section 7.6, the results of the Public Comment Hearing for the code change proposal in question shall be Disapproval. The vote count that will be reported as the Public Comment Hearing result will be the vote count on the main motion in accordance with Section 7.5.9.7.

7.5.9.10 Public Comment Hearing Results: The result and vote count on each code change proposal considered at the Public Comment Hearing shall be announced at the hearing. In the event the electronic voting system is not utilized and a hand/standing count is taken in accordance with Sections 7.5.9.7 and 7.5.9.8, the vote count will not be announced if an individual standing vote count is not taken. The results shall be posted and included in the Online Governmental Consensus Ballot (see Section 8.2).

7.6 Majorities for Final Action: The required voting majority for code change proposals individually considered shall be based on the number of votes cast of eligible voters at the Public Comment Hearing shall be in accordance with the following table:

Committee Action	Desired Final Action		
	AS	AM/AMPC	D
AS	Simple Majority	2/3 Majority	Simple Majority
AM	2/3 Majority	Simple Majority to sustain the Committee Action or; 2/3 Majority on each additional modification and 2/3 Majority on entire code change proposal for AMPC	Simple Majority
D	2/3 Majority	2/3 Majority	Simple Majority

Note 1: This public comment has been submitted by the ICC Code Correlation Committee. The public comment does not request an action and is intended to identify a possible code correlation issue. See the individual public comment for more information.

Note 2: This public comment has been submitted by CP28 Administration. The public comment does not request an action and is intended to identify a procedural issue (CP28 Section 3.6.3.1.1). See the individual public comment for more information.

Public Comment 1:

Proponent: CP28 Administration

Commenter's Reason: The administration of ICC Council Policy 28 (CP28) is not taking a position on this code change. This public comment is being submitted to bring a procedural requirement to the attention of the ICC voting membership. In accordance with Section 3.6.3.1.1 of ICC Council Policy 28 (partially reproduced below), the new referenced standard(s) NFPA 1225-2021 must be completed and readily available prior to the Public Comment Hearing in order for this public comment to be considered.

(CP28) 3.6.3.1.1 Proposed New Standards. In order for a new standard to be considered for reference by the Code, such standard shall be submitted in at least a consensus draft form in accordance with Section 3.4. If the proposed new standard is not submitted in at least consensus draft form, the code change proposal shall be considered incomplete and shall not be processed. The code change proposal shall be considered at the Committee Action Hearing by the applicable code development committee responsible for the corresponding proposed changes to the code text. If the committee action at the Committee Action Hearing is either As Submitted or As Modified and the standard is not completed, the code change proposal shall automatically be placed on the Public Comment Agenda with the recommendation stating that in order for the public comment to be considered, the new standard shall be completed and readily available prior to the Public Comment Hearing.

INTERNATIONAL MECHANICAL CODE

M25-21: Correction to Proponent Line

M25-21

Public Comment 3:

Proponent: Mary Koban, representing AHRI (mkoban@ahrinet.org) requests **As Modified by Committee**

INTERNATIONAL PLUMBING CODE

P129-21 Part I: Public Comment 1 - Correction to the definition and Section 718.3. No changes to the remainder of the public comment

P129-21 Part I

Public Comment 1:

Proponent: Joanne Carroll, representing HammerHead Trenchless (jcarroll@subtegit.com) requests As Modified by Public Comment

CURED-IN-PLACE PIPE. A plastic piping system used to rehabilitate damaged or deteriorated pipe in-place by insertion **and curing** of the cured-in-place pipe material within the existing pipe.

718.3 Pre-installation requirements. Prior to commencement of the rehabilitation, the existing piping sections to be rehabilitated shall be cleaned to remove solid debris and deposits that will interfere with the installation and finished quality of the cured-in-place pipe. A recorded video camera survey made by the installer shall document pre-installation pipe condition and include notations of the cleanouts and fitting locations, the length, and the approximate depth of the existing piping.

P129-21 Part II: Public Comment 1 - Correction to the definition and Section P3012.5. No changes to the remainder of the public comment

P129-21 Part I

Public Comment 1:

Proponent: Joanne Carroll, representing HammerHead Trenchless (jcarroll@subtegit.com) requests As Modified by Public Comment

CURED-IN-PLACE PIPE. A plastic piping system used to rehabilitate damaged or deteriorated pipe in-place by insertion **and curing** of the cured-in-place pipe material within the existing pipe.

P3012.5 Rehabilitation materials. The cured-in-place pipe materials shall be manufactured in compliance with applicable standards and certified as required in **Sections P2609.3 and P2609.4.**

INTERNATIONAL RESIDENTIAL CODE – MECHANICAL

RM8-21: Correction to Proponent name

RM8-21

Public Comment 1:

Proponent: Joseph J. Summers, representing Plumbing, Mechanical and Fuel Gas Code Action Committee (pmgcac@iccsafe.org) requests As Modified by Public Comment
