RE: Reject all nine appeals of the IECC

Dear International Code Council Board and International Energy Code Council Appeals Board,

On behalf of the almost one hundred organizations and dozens of individual signatories, we urge you to reject appeals 23-01 through 23-09, which seek to overturn measures including electric readiness, EV charging readiness, efficient and resilient code requirements, stretch code appendices, and all-electric appendices. These appeals have no merit: they are trying to relitigate substantive, consensus decisions made according to all applicable policies and procedures as laid out in the ICC Code Development Principles.

Thank you,
