Date: August 6, 2026

Subject: Endorsement of Andrew “Andy” Higgins for Re-election as ICC Director-at-Large

Dear Chairman Spencer:

On behalf of the Southern Nevada Chapter of the International Code Council, I am pleased to express our strong endorsement of Charles Andrew “Andy” Higgins, MBA, CBO, MCP, LEED AP, for re-election as a Director-at-Large on the ICC Board of Directors.

Mr. Higgins brings nearly 30 years of experience in the construction industry and has served in numerous roles that provide him with a broad understanding of the perspectives of ICC members, chapters and the building and fire safety communities. His professional background, industry certifications and experience with organizational and fiscal responsibilities have prepared him well to continue serving ICC and its membership.

Since his appointment to the ICC Board of Directors in June 2025 and election by the membership later that year, Mr. Higgins has worked diligently to understand the issues facing the organization and contribute thoughtfully to Board decisions. His prior ICC service includes serving as Secretary of the Building Membership Council and completing two terms on the IBC/IRC Exam Development Committee. In these roles, he advocated for member resources, greater participation in the code development process and increased professionalism within the industry.

Mr. Higgins’ dedication to building safety and leadership within the profession was further recognized in 2024 when he received the Emory R. Rodgers Leadership in Building Safety Fellowship Award. His experience, collaborative approach and commitment to understanding the diverse perspectives of ICC’s global membership make him exceptionally well qualified to continue serving as a Director-at-Large.

It is with great enthusiasm that we respectfully request the ICC Nominating Committee nominate Andy Higgins for re-election to the ICC Board of Directors for a three-year term.

Sincerely,

Mike Clifford
Chapter President
Southern Nevada Chapter, International Code Council
