

# Building Officials Association of Florida, Inc.

## Resolution 2010-03

WHEREAS, the Building Officials Association of Florida at its 58th Annual Educational Conference and Trade Expo assembled jointly with the Florida Association of Plumbing, Gas and Mechanical Inspectors in Tampa, Florida on June 6-9, 2010, and

WHEREAS, the introduction of the International green Construction Code is an important and needed part of the built environment. Further, the support and presence of ICC staff to support this new standard helped to make our theme of Going Green a success as well as to introduce the IgCC to our membership and attendees;

Now therefore be it resolved,

That the Building Officials Association of Florida extends its support and recommendation for adoption of the International green Construction Code to The International Code Council, Inc. and has recommended a code change to the State of Florida that the IgCC be included as a part of the Florida Building Code as an appendix to the Code in order to assist local governments in their quest for greener construction methods and greater sustainability of the built environment. This recommendation supports the IgCC as it helps designers, contractors, code enforcement personnel and communities comply with the existing, governing adopted building code requirements.
