What is Phentermine?

Phentermine is a prescription stimulant used primarily for short-term weight management. It works by suppressing appetite and increasing energy levels, which supports adherence to a calorie-controlled diet and active lifestyle.

Phentermine is most effective when combined with:

- A balanced, calorie-controlled diet
- Regular physical activity
- Healthy lifestyle modifications

It is particularly suitable for adults struggling with obesity or weight-related conditions such as high blood pressure, high cholesterol, or diabetes.
