

COLIN HERREN

Colin has been in the construction industry since the late 1980's. He started his career in the building trades classes in high school and went on to obtain an Architecture degree from Ferris State University. Wanting to stay in his home community of Mt. Pleasant, he secured a Residential Builders license in 1993, and formed his first building company. Later in 1999, he became a partner in Greenwald & BC, which he co-operated with the Greenwald family until 2013 when he took over the entire operation which he now co-owns with his cousin Preston. Together they undertake a vast array of projects from residential renovations, new custom homes, commercial build outs, educational and industrial facilities and hundreds of small renovations or finish updated per year.

Colin has served as a board member on the local, State, and National level of the Home Builders Association for more than 25 years. He has also held the office of President at both the local and State level and is Life Director of the National Association of Home Builders. During his time served in the Home Builders Association, he has fought tirelessly to promote affordable home ownership and defended America's homeowners at nearly every level of government. He has appeared before many bodies from County Commissions to the Capital building in Lansing. Colin has also traveled to Washington DC to meet with our law makers to ensure that our government protects the American dream of home ownership.
