Deadline Approaching for Proposed Changes to Group B I-Codes

Committee Action Hearings will be held this spring to consider the proposed code changes

Washington, D.C. – The International Code Council announced that the deadline to submit proposed changes to the 2022 Group B International Codes (I-Codes) is January 10, 2022, at 11:59 pm PT.

Group B includes administrative chapters for the I-Codes; structural provisions in the International Building Code; the International Existing Building Code; the building provisions in the International Residential Code; and Chapter 1 of the International Green Construction Code. To submit proposals for the Group B codes, go to [cdpACCESS](#).

The I-Codes are the most widely used and adopted set of modern building safety codes; they protect against fires, weather-related events, structural collapse and other disasters. The Code Council code development process is transparent, accessible and inclusive, and all interested parties are encouraged to participate.

"The integrity of the I-Codes are dependent on input from the building safety community," said Code Council

Senior Vice President, Technical Services, Michael Pfeiffer. "The hearings offer code officials, architects, builders, structural engineers, fire officials, and building professionals an opportunity to provide input on proposed code changes to the Group B codes."

The 2022 Committee Action Hearings will be held in person in Rochester, NY, at the Rochester Riverside Convention Center from March 27 through April 6. The hearings will be held in a single track with the schedule of codes to be determined. Code changes will be posted on or before February 23, 2022. The hearing schedule will be posted approximately two weeks prior. You can find more information about the committee action hearings [here](#).

Additional resources:

- To submit a code change proposal, visit iccsafe.org/cdpaccess. Anyone can submit a code change, but registration is required. Registration is free and only takes a few minutes.
- For more information about the code development process, [click here](#).
- See page 3 of the [2021/2022 Code Development Schedule](#) for details on code chapters, notes and committee information for the Group B codes.
