Subject: International Energy Conservation Code

To Whom It May Concern:

My name is Don Pratt and I am a Code Official for the City of Orchard Lake, Michigan. I am also a builder and developer of single family homes. I am writing you today to support a possible change from the existing governmental consensus process to an ANSI standards development process. I strongly believe the ANSI process will provide a balanced committee approach which will represent the entire industry. I further believe the ANSI development process will provide a cost-effective approach to the energy needs for the individuals that will be purchasing homes in the future. I have been involved in the development of the International Green Construction Code which used the ANSI process. As you know this process worked extremely well.

Please consider replacing the existing governmental consensus process with an ANSI standards development process to ensure a fair and balanced energy code in the future.

Respectfully submitted,
Donald L. Pratt
