601.5.1

Proponent: Jack Bailey, One Lux Studio, representing self (jbailey@oneluxstudio.com)

Revise as follows:

601.5.1 Multiple buildings on a site. For building sites with multiple buildings, the energy use associated with the building site shall be assigned on a proportional basis to each building based on total gross floor area of each building in relation to the total gross floor area of all buildings on the building site.

Where energy is derived from either renewable or waste energy, or both sources located on the building site, ~~within individual buildings, or on~~ in individual buildings and delivered to multiple buildings, the energy so derived shall be assigned on a proportional basis to the buildings served based on building gross floor area. ~~Energy delivered from renewable and waste energy sources located on or within a building shall be assigned to that building.~~

Exception: Where it can be shown that energy to be used at the building site is associated with a specific building, that energy use shall be assigned to that specific building.

Reason: Editorial. The intent of the first sentence seems clear, but the wording is confusing. The last sentence appears to directly contradict the first sentence, and should be deleted.

Cost Impact: Will not increase the cost of construction.
