

GG18-14

101.5

Proponent: Carl Baldassarra, representing Rolf Jensen & Associates, Inc. (cbaldassarra@rjagroup.com)

Revise as follows:

101.5 Intent. The purpose of this ~~This code is intended~~ to establish the minimum requirements to safeguard provide a reasonable level of safety for the environment, and protection of public health, and general welfare, through the establishment of requirements to reduce the negative impacts and increase the positive impacts of the built environment on the natural environment and building occupants. This code is not intended to abridge or supersede safety, health or environmental requirements under other applicable codes or ordinances.

Reason: This proposed revision is consistent with the changes made to many of the model codes in the Group B hearing process with approved Public Comments to ADM6-13. It is intended to better address the intent of the code by using the term "reasonable level of" safety, protection, etc., rather than the vague and apparently more absolute term "safeguard." The change at the beginning of the first sentence will make IgCC have terminology consistent with other I-Codes.

Cost Impact: Will not increase the cost of construction.
