ICC Community Development Solutions Announces the Availability of Municipality® Code Connect™ for Municipality 5® Users

This new offering is the first solution with fully-integrated access to the International Code Council's codes and standards.

Rochester, N.Y. – ICC Community Development Solutions (ICC CDS) announced today the integration of *Municipality Code Connect* with the *ICC Code Connect™ API* software. *Municipality Code Connect* allow organizations using Municipality 5 to instantly access the latest building code requirements within the digital application. The software contains simplified search tools, access to the latest code content, confidence in accuracy and the ability to streamline common code references.

“We are proud to offer customers currently using Municipality 5 the opportunity to add *Municipality Code Connect* to their solution,” said Dan Foster, General Manager, ICC Community Development Solutions. “With this software, our customers will be able to ensure accuracy and compliance with the most up-to-date codes and standards for their jurisdictions.”

Municipality is a cloud-based software solution built with input from U.S.-based code officials targeting and supporting the permitting, licensing and inspection/code enforcement functions within a local jurisdiction. It allows code officials to provide permits or issue certificates, conduct building, fire and safety inspections, and look up codes and standards efficiently and securely from anywhere.

This announcement coincides with the initial launch of the *ICC Code Connect API* and will meet customer requests for easy access to the Code Council's codes and standards. Municipality 5 also integrates with eCode360® for municipalities that access municipal codes through the General Code platform.
