

IECC COMMERCIAL COMMITTEE FINAL RESULTS OF CHANGES TO PUBLIC COMMENT DRAFT #1 PROCESS

On September 6, 2022, energy.cdpassess.com was opened for public comment on the IECC Commercial Public Comment Draft #1. The submittal deadline was October 21, 2022. A total of 246 Commercial proposals were received. In addition, 28 committee proposals were submitted.

Following the posting of the proposals, the IECC – C Subcommittees initiated their review of the proposals that fell under their scope. The process resulted in Subcommittee recommendations being forwarded to the Consensus Committee for review and action. All Subcommittee and Consensus Committee meetings were open meetings. The IECC – C Consensus Committee finished their review and action on the submitted proposals at their April 26, 2023 meeting.

Following the last meeting of the Consensus Committee, the ballot process for all the code changes approved by the committee in accordance with the ICC Consensus Procedures was initiated on April 28. The ballot process concluded on June 12.

The Final Results of the ballot process was the approval of all balloted code changes by a 2/3 vote in accordance with Section 9.4 of the ICC CP.

The approved code changes will be incorporated into Public Comment Draft #2. The draft of legislative changes has been open for comment on substantive technical changes in [energy.cdpassess](http://energy.cdpassess.com) since May 17. The comment period closes on Friday, June 30 at 11:59 pm Pacific.
