II. DISCUSSION ON STANDARD VS. CODE

Medard Kopczynski, Chair led the discussion. The topics included conflicts between standards and codes as well as referencing a standard in a code and how it relates to building design requirements. It was noted that overall ICC 605 is intended to be part of a suite of standards that address residential resiliency and that codes tell you what you are required to do, and the standard tells you how to do it. It was also stated that in addition to that concept, to the greatest extent possible, this document should also be able to stand on its own.
