

ICC Multi-Hazard Resiliency for Residential Construction Standards Committee (IS-MHRRC)

The second public teleconference meeting (3rd mtg overall) of the ICC Multi-Hazard Resiliency for Residential Construction Standards Committee for the development of the new ICC 605 Standard for Residential Construction in Regions with Wildfire Hazard will be held November 1, 2022 remotely via Webex.

- MEETING NOTICE -

Teleconference Meeting on Tuesday, November 1, 2022, 1:00 pm - 4:00 pm CT

Agenda:

REVIEW OF ICC 605 SCOPE

TASK GROUPS PRESENTATION AND DISCUSSION

- A. Site and Area Requirements
- B. Building Design Requirements

This meeting is open to the public.

If you plan on attending, please contact Keith Enstrom, Committee Secretariat, kenstrom@ICCsafe.org for Webex and call in information.

The purpose of this standard is to specify enhanced prescriptive methodologies of wildfire resistant design and construction details for buildings and other structures of wood framed, steel framed, concrete, or masonry construction sited in wildfire hazardous areas. This standard provides prescriptive details for walls, floors, roofs, foundations, windows, doors, and other applicable components of construction.

An ICC webpage dedicated for posting committee related agendas, meeting minutes, meeting materials and all other documents is available to the committee and the public.
