What Is Hydrocodone?

Hydrocodone is a prescription opioid analgesic used to relieve **moderate to severe pain**. It works by **binding to opioid receptors in the brain and spinal cord**, reducing the perception of pain and providing effective relief.

Primary Uses of Hydrocodone:

- Post-surgical pain management
- Injury or trauma-related pain
- Chronic moderate to severe pain under medical supervision
- Acute pain episodes requiring potent analgesics

Hydrocodone helps patients **regain comfort, mobility, and daily functionality**, making it essential for effective pain management.
