The International Code Council and ICC-ES showcase commitment to safety in the building industry at Design and Construction Week

The Code Council family of solutions sponsored several activities to network and learn about the latest research and technologies in the building industry

Washington, D.C. – The International Code Council and the ICC Evaluation Service (ICC-ES) fostered existing client relationships and established new connections with design and construction professionals from around the world during the seventh annual Design and Construction Week in Las Vegas, Nevada. Returning as major sponsors and exhibitors at the 2020 National Association of Home Builders (NAHB) International Builders’ Show (IBS) and the National Kitchen & Bath Association (NKBA) Kitchen & Bath Industry Show (KBIS), the Code Council and ICC-ES sponsored a series of networking and educational events.

“As our fourth year serving as a major sponsor and exhibitor for this important industry event, we are grateful for the opportunity to network and collaborate with our partners in the home building community,” said Code Council Board President Greg Wheeler, CBO. “The connections and feedback we’ve received from the people we meet during the event return home with us and help us to continue the work of developing codes and standards that provide building safety and resilience for communities around the world.”

Code Council staff and board members met with industry leaders from NAHB and other organizations throughout the week to discuss changes and trends in the built environment. Many manufacturers also connected with ICC-ES and NTA personnel and applied for testing, product listing and evaluation services at the ICC-ES exhibit booths. NTA, a leading provider of testing services, product certification, inspection, engineering, off-site construction plan review and code evaluations, is the most recent addition to the Code Council family of solutions. For the fourth consecutive year, ICC-ES sponsored the [Metrostudy Housing Outlook Breakfast](#), where more than 300 building professionals gathered to discuss the latest economic and industry trends.

Next year IBS and KBIS will be held on February 9-11, 2021, in Orlando, Florida. For more information, visit www.buildersshow.com and www.kbis.com.

###

About the International Code Council

The [International Code Council](#) is a nonprofit association that provides a wide range of building safety solutions including product evaluation, accreditation, certification, codification and training. It develops model codes and standards used worldwide to construct safe, sustainable, affordable and resilient structures.

About ICC Evaluation Service

The [ICC Evaluation Service](#) (ICC-ES), a member of the Code Council family of solutions, is a nonprofit, limited liability company that does technical evaluations of building products, components, methods and materials. ICC-ES [evaluation reports](#), [building product listings](#) and [plumbing, mechanical, fuel gas](#) and [solar thermal product listings](#) provide evidence that products and systems meet requirements of codes and technical standards.
