### **Volunteer opportunities available on International Code Council committees**

*Applications are due by Wednesday, October 25*

**Washington, D.C.** – Volunteer opportunities are available on several distinguished International Code Council (ICC) Standards Consensus Committees. Committee members play a key role in the codes and standards development process and are integral to developing the model codes and standards that provide for safe buildings and resilient communities in the U.S. and many other countries. Volunteers have the chance to share their expertise, build their skills and knowledge, learn more about the consensus process and network with peers from throughout the global community who have similar interests.

The Standards Consensus Committees review applicable ICC standards to determine whether the standard will be re-affirmed, revised or withdrawn. Terms last through completion of the updated standard. Volunteer applications are due by Wednesday, October 25, 2017, for the following committees.

- The **Landscape Irrigation Emission Devices Standard Consensus Committee** reviews ICC Standard 802-2014, which applies to sprinklers, bubblers, drip emitters and other water emitters intended for use within turf and landscape irrigation systems.
- The **Consensus Committee on Storm Shelters** reviews ICC/NSSA Standard 500-2014, which establishes the minimum requirements to safeguard the public health, safety and general welfare through design, construction and installation requirements for storm shelters.
- The **Consensus Committee Residential Construction in High Wind Regions** reviews ICC Standard 600-2014, which establishes the minimum requirements to safeguard the public health, safety and general welfare through design, construction and installation requirements for buildings and other structures sited in high-wind regions.

Also, the **Codes and Standards Council**, which advises the ICC Board of Directors regarding applications for code and standard related committees and provides oversight of related procedures, currently has five vacancies. The term is January 1, 2018, through December 31, 2020.
