ICC-ES offers new service to help manufacturers with product approval in Florida

The company continues its commitment to customer service with expanded report holder support

BREA, CALIF. — ICC Evaluation Service (ICC-ES) proudly offers application submittal service to obtain State of Florida approval for ICC-ES clients. ICC-ES is an approved evaluation, validation and quality assurance entity within Florida.

Florida has a separate building product listing program including review of products used under the latest version of the Florida Building Code and High Velocity Hurricane Zones (HVHZ). ICC-ES conducts the technical and manufacturing quality validations as part of the Florida State product approval utilizing Method 1, Option C – Evaluation Report from a Product Evaluation Entity. This method streamlines the process to obtain a Florida product approval.

Once an ICC-ES evaluation report is published with a Florida Building Code (FBC) Supplement, ICC-ES can assist the report holder in navigating the Florida Department of Business and Professional Regulation (DBPR) product approval process from application to final approval.

“ICC-ES has a long history of evaluating building products for use under the International Codes and Florida Building Code and has worked with the Miami Dade county Department of Regulatory and Economic Resources for a number of years,” said ICC-ES Vice President of External Relations and Client Services William Gould. “This new service streamlines the process and takes it to the next level. Obtaining a Florida product approval helps manufacturers build confidence and earn the trust of code officials that the products meet the state’s building code requirements.”

After a successful pilot program with a key client, ICC-ES is now offering this service to all report holders who need assistance with Florida product approval applications and validation after the ICC-ES evaluation reports and Florida Building Code Supplements have been published.

For more information or to take advantage of this one-stop-shop service, visit www.icc-es.org.

###

About ICC-ES

The ICC Evaluation Service (ICC-ES), a member of the International Code Council family of solutions, is a

nonprofit, limited liability company that does technical evaluations of building products, components, methods and materials. ICC-ES [evaluation reports](#), [building product listings](#), and [plumbing, mechanical and fuel gas](#) listings provide evidence that products and systems meet requirements of codes and technical standards.

About the International Code Council

The [International Code Council](#) is a nonprofit association that provides a wide range of building safety solutions including product evaluation, accreditation, certification, codification and training. It develops model codes and standards used worldwide to construct safe, sustainable, affordable and resilient structures.
