## **ICC-ES issues Uponor PMG listing for AquaSAFE fire sprinkler pipe and fittings system**

*Listing certifies compliance with applicable codes and standards*

**Brea, Calif.** – ICC Evaluation Service (ICC-ES) has issued a plumbing, mechanical and fuel gas (PMG) listing, PMG-1541, for the Uponor AquaSAFE™ fire sprinkler pipe and fittings system for use in wet-pipe systems. The product is the first thermoplastic fire sprinkler piping system to pass the in-depth evaluation by ICC-ES and obtain an ICC-ES PMG listing to UL 1821, Thermoplastic Sprinkler Pipe and Fittings for Fire Protection Service (3<sup>rd</sup> Ed.).

The AquaSAFE fire sprinkler pipe and fittings system is designed for residential applications under section P2904 of the International Residential Code. The AquaSAFE pipes are produced from a crosslinked polyethylene compound and the fittings from either an engineered polymer or lead-free (LF) brass with an ASTM F1960 connection. The pipes and fittings are available from ¾" to 1¼" sizes.

“Obtaining an ICC-ES PMG listing shows that this cutting-edge product is safe for installation in residential structures when installed per the manufacturer’s specifications outlined in the PMG listing report,” says Maribel Campos, Director of Standards for ICC-ES PMG Division. “We have evaluated this product in accordance with all applicable codes and standards and determined it has met the necessary requirements.”

“Working with the ICC-ES PMG group to obtain this report was a great experience. The staff was quick to address our needs and always professional in their dealings with us,” said Rick Stock, Standards Manager at Uponor North America. “Obtaining the ICC-ES PMG report shows Uponor North America’s commitment to delivering a superior product with an unmatched customer experience while affirming to specifiers and code officials that our products can be purchased and installed with confidence.”

The ICC-ES PMG Program is a preferred provider of PMG listings. ICC-ES is a subsidiary of the International Code Council, which has over 64,000 members that include code officials and regulatory bodies, architects, engineers and more.
