ICC INTERNATIONAL CODE COUNCIL®

Working with Communities to Fund and Execute Resilient and Efficient Code Implementation Solutions

The **Bipartisan Infrastructure Law** includes $225 million in funding for resilient and efficient energy code implementation. The four organizations listed below form the Strategic Energy Code Implementation Team (SECIT), a multi-functional project team of leading energy experts with specialized building energy code knowledge.

The SECIT is poised to support state and local governments seeking competitive grant funding—made available under the U.S Department of Energy's Resilient and Efficient Codes Implementation (RECI) Funding Opportunity Announcement—to facilitate energy code development, implementation, compliance, technical assistance, and more. The SECIT looks forward to collaborating with jurisdictions to develop competitive applications that include both well-established approaches to and innovative strategies for realizing energy code benefits.

SECIT PROJECT TEAM

ICC INTERNATIONAL CODE COUNCIL®
- Training & Education
- Certification Programs
- Code Development & Digital Codes
- Remote Virtual Inspection
- Accreditation
- Grant Administration & Application Development

NMR Group, Inc.
- Compliance Studies
- Evaluation of Code Trainings & Awareness
- Energy Optimization Analysis
- Evaluation of Code Development & Adoption

PERFORMANCE SYSTEMS DEVELOPMENT
- Training & Education
- Software/Tool Development
- Compliance Studies
- Program Implementation

SEEA SOUTHEAST ENERGY EFFICIENCY ALLIANCE
- Marketing & Outreach
- Enforcement & Compliance Support
- Project Administration
- Program Development
- Resource Development
