Subject: IECC - code or standard?

Dear ICC:

I support retaining the current framework for IECC maintenance (i.e., codes development). However, ICC may wish to consider modifying requirements for proposals (such as achieving a more specific cost effectiveness target, similar to how ASHRAE building energy standards are administered).

If ICC wishes to transition the IECC from a code to a standard, then ICC should simply reference ASHRAE 90.2 and ASHRAE 90.1 to align with the ANSI guidance that duplicative standards should be avoided.

Thank you,

Mike
