The International Code Council joins other industry leaders at the 2022 Off-Site Construction Summit

The Code Council's Vice President of Innovation, Ryan Colker, will speak about attainable solutions and abilities of off-site construction

Washington, D.C. – The International Code Council will join leading off-site, modular and prefabricated construction experts at this year's Off-Site Construction Summit on August 17, 2022, in Washington, D.C. The event features presentations and exhibits highlighting the off-site construction industry's ability to create accessible, high-quality and affordable housing; it provides diverse networking and learning opportunities for those in attendance.

Ryan Colker, Vice President of Innovation for the Code Council, will present on *Driving Off-Site Construction Solutions: From Tiny Houses to Shipping Containers and Beyond*. His session will dive into topics such as the existing standards and regulatory landscape for the varying types of off-site construction projects; solutions to help address the availability, affordability and efficiency of housing; and research and development initiatives for new construction and existing buildings.

"Off-site construction has grown to become a sought-after solution to address issues including housing affordability, building quality, sustainability, and workforce availability," said Colker. "The Off-Site Construction Summit offers a unique opportunity to reach key partners across the industry and engage in discussions around the challenges that have surfaced due to the varying regulatory processes among jurisdictions and their solutions."
