The International Code Council joins the offsite construction industry at the 2022 World of Modular Annual Convention and Tradeshow

As a key sponsor, the Code Council will participate in showcasing off-site construction solutions and share information about the new standards released in conjunction with Modular Building Institute

Washington, D.C. – The International Code Council family of solutions will join modular construction professionals from around the world at this year’s 39th annual [World of Modular Convention and Tradeshow](#) hosted by the Modular Building Institute (MBI) on April 25-28, 2022.

The World of Modular Convention provides individuals in the commercial modular building industry with the opportunity to network, learn from high-profile experts, display new products and attend educational presentations about the latest trends in off-site construction. The event also extends the opportunity to discuss ongoing industry issues, including housing affordability and building quality and sustainability, and how the use of off-site construction is seen as one approach to help confront these challenges.

The Code Council and MBI developed multiple resources in 2021 to help support the safe and efficient use of off-site construction, which will be discussed at this year’s event. The organizations released two new American National Standards to support consistency within the off-site construction process and introduce how off-site construction projects demonstrate compliance with building codes.

As one of the key sponsors of the World of Modular Convention, the Code Council will be running several activities during the event:

- Members of the ICC family of solutions, including NTA and ICC-ES, will be exhibiting at booth 213, which will be staffed with a dedicated team of professionals to facilitate networking and learning opportunities. There will also be a digital booth for participants who will be joining the event virtually.
- Ryan Colker, the Code Council’s Vice President of Innovation, will be speaking on the introduction to ICC/MBI Off-Site Construction Standards on Tuesday, April 26, at 10:30 AM CST.

“The World of Modular Convention offers an unmatched opportunity for innovation and collaboration among professionals within the modular construction industry,” says Code

Council Chief Executive Officer Dominic Sims, CBO. “The Code Council family of solutions is committed to aiding the industry and offers many resources to help individuals understand the benefits of off-site construction.”

###

About the International Code Council

The [International Code Council](#) is the leading global source of model codes and standards and building safety solutions. Code Council codes, standards and solutions are used to ensure safe, affordable and sustainable communities and buildings worldwide.

About ICC NTA, LLC

[ICC NTA](#) provides code evaluation, inspection, engineering, off-site construction plan review, and product testing services, as well as independent quality and standards compliance verification for many building products.

About ICC-ES

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. The ICC-ES Environmental Programs issue VAR environmental reports that verify a product meets specific sustainability targets defined by today’s codes, standards, green rating systems and ICC-ES [environmental criteria](#). ICC-ES is a member of the [ICC](#) family of solutions.
