

ICC IS YOUR JURISDICTION'S ONE-STOP SHOP

- + Test Development
- + Test Maintenance
- + Test Administration

Professional Services for Contractor Trades
Licensing Agencies

Ensure that workers licensed in construction trades have essential knowledge about building safety codes and standards adopted within your jurisdiction. ICC's examination services are your one-stop shop, providing:

- + More than 500 exam titles
- + A flexible, customized program with a dedicated program manager to help you through the process
- + Computer-based or paper-and-pencil testing at more than 350 approved sites nationwide

With more than 60 years of experience in building code testing, ICC Contractor Trades Examination Services delivers industry credibility and recognition; an expert staff with extensive knowledge of International Codes® and other model building safety codes; and unparalleled confidence in developing, maintaining, and administering certification and licensure programs. ICC develops and administers customized construction trade licensing exams for hundreds of state and municipal jurisdictions.

ICC CONTRACTOR TRADES EXAMINATION SERVICES INCLUDE:

- + Professionally trained proctors
- + Data on exam performance
- + Secure registration and testing facilities
- + More than 350 exam sites
- + Official pass list on the ICC website www.iccsafe.org/CertificantList
- + Examination information on ICC website www.iccsafe.org/JurisdictionExams

You also have the added benefit of ICC's credibility and reputation in the industry as the source for up-to-date codes. ICC is your dedicated partner in this process, answering questions, creating a dedicated program for your jurisdiction, and making improvements to provide the best examination service available.

Exams are offered either via computer-based testing (CBT), or via paper/pencil. CBT exam takers receive immediate pass/no pass notification.

The most widely used licensing exam categories include the residential and building contractor examinations, master and journeyman plumbing, electrical, gas and mechanical. Additionally, ICC has the flexibility to develop customized exams.

EXAMINATION LEVELS

- + Master
- + Residential

Jurisdictions maintain control over local examination content and standards. Your jurisdiction can depend on ICC's industry credibility and recognition, built over more than 60 years of test development, maintenance and administration experience in the building code and construction space. Work with expert committees on national and local exam development and receive local validation of examinations. Proceeds from the program are returned to the community through member services.

Visit www.iccsafe.org/Jurisdictions to complete the jurisdiction application. For more information about ICC's Contractor Trade Examination Services, visit www.iccsafe.org/TradesBrochure

NEXT STEPS

Once the application is submitted, an ICC program manager will contact you within two weeks to review the process, understand your jurisdiction's needs, and answer any questions you may have. Your program manager will work with you to determine the best exams to suit your jurisdiction's needs, and provide a timeframe in which you can expect your exam program to launch. Timeframe to launch varies depending on content and individual jurisdictional needs.

ICC will work with you to promote your exam program and educate potential candidates. Ask your program manager for more information about marketing your new exam process.

As your jurisdiction's dedicated partner, ICC strives to make contractor trade examination services an easy and reliable way to ensure that workers licensed in construction trades have essential knowledge about building safety codes and standards adopted within your jurisdiction.
