

## Wendy Wan

---

Wendy Wan is an administrative architect for the New York City Department of Buildings. Her role in the Technical Affairs division provides technical expertise for the design and construction of buildings throughout the City as well as contributes to the agency's efforts in code revision and development. Additionally, she provides floodplain management support for applications in the City's flood hazard areas.

Previously, Wan was a project director at the Office of Sustainable Design at the New York City Department of Design and Construction, and has also worked in private architectural firms.

Wan received a Master of Science in architectural studies from the University of Texas at Austin and a Bachelor of Architecture from Carnegie Mellon University. Wan is a Registered Architect in the State of New York and a Certified Floodplain Manager.
