ICC STANDARDS - PUBLIC COMMENT FORM

PLEASE SEE INSTRUCTIONS (SUBMITTAL RULES OF PROCEDURES). ALL SUBMITTALS MUST BE IN COMPLIANCE WITH THESE PROCEDURES.

CLOSING DATE: All Comments Must Be Received by the Announced Closing Date

- 1) Indicate the format in which you would like to receive your Public Comments Report (PCR):

CD Download

- 2) **PLEASE TYPE OR PRINT CLEARLY: FORMS WILL BE RETURNED if they contain unreadable information.**

Name:	Rob Pickett				Date:	Feb. 2, 2021
Jurisdiction/Company:	RobPickett & Associates, LLC					
Submitted on Behalf of:	Log & Timber Homes Council, NAHB					
Address:	P.O. Box 490					
City:	Hartland	State:	VT	Zip +4:	05048-0490	
Phone:	802-738-9230	Ext:		Fax:		
e-mail:	robpickett@vermontel.net ; robpickettandassoc@gmail.com					

Signature on File

- 3) *Signature:

**I hereby grant and assign to the ICC all rights in copyright I may have in any authorship contributions in any proposal or comment I make to the ICC. I understand that I will have no rights in any ICC publications that use such contributions in the form submitted by me or another similar form and certify that such contributions are not protected by the copyright of any other person or entity.*

- 4) Indicate appropriate ICC Standard associated with this Public Proposal – Please use Acronym: IS-Log
(See bottom of this form or the instructions for list of Names and Acronyms for the ICC Standards)

- 5) Indicate the Standard Proposal Number that is being addressed by this Public Comment (if applicable): _____

- 6) Revision to: Section _____ Table 305.3.1.1 Figure _____

- 7) COMMENT Revise as follows (check BOX and state proposed change):

Revise as follows: Add new text as follows Delete and substitute as follows: Delete without Substitution:

Show the proposed NEW or REVISED or DELETED TEXT in legislative format: Line through text to be deleted. Underline text to be added.

The table graphic below is from the MS Excel Workbook “Support for LTHC Proposals”, tab T305.3.1.1. The footnotes to the table are provided in text below the graphic.

TABLE 305.3.1.1
U-FACTOR OF LOG WALL (U_w) BY LOG THICKNESS (W_t) AND SPECIFIC GRAVITY (G_s)

SPECIFIC GRAVITY (G_s)	Average Width

0.70	0.228	<u>0.212</u>	0.197	<u>0.185</u>	0.174	<u>0.164</u>	0.155	<u>0.147</u>	0.140	<u>0.134</u>	0.128	<u>0.122</u>	0.117	<u>0.113</u>	0.094	<u>0.089</u>	0.084	0.079	0.075	0.068

For SI: 1 inch = 25.4 mm.

Notes to Table:

- The tabulated values assume MCs to = 12 percent.
- Conversion of nominal size to average width can be approximated using the following factors:
 - Flat inside and outside 97.50%
 - Flat inside, profiled outside 88.00%
 - Diameter, notched/coped 83.60%
 - Full round or round inside and outside 78.50%
- To adjust from 12% MCs to specific climate zone, multiply the U-factor by the respective factor.

Example: 7" WL @ Gu-0.35, 0.097

Climate Zone	MCs	Adjustment factor	Resulting U-Factor
Dry	10%	<u>0.9807</u>	<u>0.095</u>
Moist	13%	<u>1.0087</u>	<u>0.098</u>
Warm-Humid	14%	<u>1.0186</u>	<u>0.099</u>
Marine	15%	<u>1.0269</u>	<u>0.100</u>

COMMENT Continued (Attach additional sheets as necessary)

This proposal revises the table to expand the information presented in this prescriptive path option. The purpose is to reduce confusion regarding the use of this table as opposed to nominal dimensions (natural tapered round or milled uniform).

Revisions include adding average widths for 1/2" increments up to 12", 1" increments from 12" to 16", and then 18".

Notes 2 and 3 are added for clarification. Nominal size to average width adjustments can be used when specific documentation is not available. Climate zone impacts the Moisture Content in Service, which affects the U-factor of the wood. The conversion adjusts the 12% MCs to the actual climate condition.

8) SUPPORTING INFORMATION (State purpose and reason, and provide substantiation to support proposed change):

SUPPORTING INFORMATION Continued (Attach additional sheets as necessary)

The modified table and added footnotes are important as this is a prescriptive path option. The footnotes effectively modify the tabulated values to reflect the varied nature of products on the market.

While REScheck uses 1" increments, a survey of log profiles and nominal sizes demonstrated that the resulting average width increments can vary as little as 1/8". The proposed increments were found to be sufficiently significant.

There is no cost implication of this change.

PLEASE USE SEPARATE FORM FOR EACH COMMENT
