

Solar Thermal Standard Consensus Committee (IS-STSC)

SCOPE:

ICC 900/SRCC 300

Solar energy systems used for heating, cooling, dehumidification—Types: Residential, commercial –
Subassemblies/Components: Pump stations, unfired tanks (pressurized & unpressurized)

ICC 901/SRCC 100

Solar thermal collectors using a fluid for heat transfer—Types: Glazed, unglazed, concentrating, tubular, transpired, PVTs – Fluids: Air, Glycol, Water, etc.

ICC 902/APSP 902/SRCC 400

Solar water heating systems used with swimming and wading pools and spas—Types: Residential, commercial –

ICC 903/SRCC 500

Solar hot water storage tanks.

MEMBERSHIP

Robert Grady [G]

Operations Manager
LabTest Certification, Inc.
Las Vegas, NV

William Jason Hall [E]

Sr. Engineering Manager,
Compliance and Certification
Rheem Manufacturing Co.
Montgomery, AL

Steve Harrison, PhD, Peng. [G]

Professor and Director,
Solar Calorimetry Laboratory,
Dept. of Mechanical & Materials Engineering
Queen's University
Kingston, ON

Richard Horton [E]

Regulatory Affairs Manager
Rheem Australia Pty Ltd (Solahart)
Rydalmere, NSW Australia

Kevin D. Kalakay [C]

Chief Mechanical Inspector
State of Michigan
Lansing, MI

Shawn Martin [E] *chair*

Senior Solar Thermal Products & Solutions Engineer
SunEarth, Inc.
Fontana, CA

Mitchell Ramseur, R.A., NCARB [H]

Licensed Architect
M Ramseur & Associates, PLLC
Atlanta, GA

Henry K. Vandermark [A]

President
Solar Wave Energy, Inc.
Cambridge, MA

Austin Zeller MSME, EIT [H]

Design Engineer III
Steffes, LLC
Dickinson, ND

Staff Liaison:

Lisa Reiheld

Director, PMG Resources
Government Relations
